

An aerial view of the school and grounds

Key Vocabulary

Word	Diagram	Definition
map symbol		A picture or sign on a map that represents something.
key		Helps us understand map symbols.
aerial view		A view from above (bird's eye view).
sketch map		A simple map with basic details.
compass		A tool to show people which direction they are travelling (North, East, South or West).

In this topic, we will combine our Geography and Science knowledge and skills.

We will use atlases and Google maps to locate world habitats.

Examples of habitats:

We will explore microhabitats within the school grounds and find answers to fieldwork questions.

Examples of microhabitats:

Knowledge Organiser: Living things and their habitats

Careers connected to habitats:
ecologist, environmentalist, naturalist

Lesson Sequence

1. Compare the differences between things that are living, dead, and things which have never been alive

2. Identify and name a variety of plants and animals in a microhabitat

3. Design a suitable microhabitat where living things could survive

4. Find out what animals eat to survive in their habitat

5. Understand food chains

6. Understand the journey food makes from the farm to the supermarket

Food Chain

The grass is eaten by the rabbit.

The rabbit is eaten by the fox.

Microhabitats

in a flower

in a log

under a leaf

under a log

Dead or Alive

living			All living things breathe, eat, grow, move, reproduce and have senses.
dead			Something that was once a living thing.
non-living			Something that has never been alive.

Habitats

woodland

farmland

pond

coastal

desert

mountain
